**Subject:** RE: Updated project schedule

Bill,

Thanks for this updated Gantt chart. Randy will be attending in my stead today. Here are my inputs and request for information:

- Can you provide a summary of Ecology comments on the SMP draft? What anticipated changes do you foresee needing to incorporate (line item #108) into the next draft, and which jurisdictions do they impact?
- We provided a first draft SMP to Ecology in June, and we're scheduled to submit a revised draft in November, and then again in March '16 along with a host of additional submittals through June '16. Is line item #122 review and comment on Final draft? I don't see the submittal and approval to Ecology of our final draft SMP preceding the local adoption process. Can you clarify?
- Can you explain line item #110?
- Can you provide a high-level summary of the no net loss report content/arguments (line item #118) at this point so that we can begin digesting prior to our meeting the end of next month?
- Can you provide a planning commission pre-cursor packet of information that we could offer up to planning commissions in advance of the local adoption formal workshops? It would be good to get the P.C.'s generally familiar with the latest SMP content, schedule, and local adoption sequence prior to Feb/March. I know that W-W county P.C. and Waitsburg P.C. would appreciate the chance to preview. You would not need to present. But by packaging a few critical SMP documents in draft form (i.e. this schedule, copy of jurisdictional SMP drafts (line item #110), a paragraph on status of major remaining items (i.e. No Net Loss report, and SEPA review) could be presented by those of us on the respective P.C.s as a look-ahead for the Feb/March work sessions.

Thanks for your good work.
